

# Expandable Universal Plug

## Product Technical sheet

### ABOUT

- The Expandable Plug is designed to secure conduit systems from the costly and often damaging incursion of water sedimentation and nesting animals.
- The plug functions by compressing a thermoplastic elastomer seal between two UV, Ozone and chemically resistant compression plates through the hand tightening of
- a loop or wing nut; the compressed seal expanding into full contact with the inside pipe walls thereby providing an effective, permanent, positive seal to your conduit system in seconds. Once in place, the plug will not move until you decide to remove it.
- All plugs come with a hollow stem, sealed on top by a rotating cap. This feature allows to drain or add liquids or gases from the duct, without dismantling the plug.
- All plugs come with a 1/2" rope tie for sealing and securing excess rope within the conduit system for future use.
- The plugs can be easily removed and re-used in case needed.

### AVAILABLE PRODUCTS

Size (inch)	Cat. No.	Duct range (inch)	Duct range (mm)
2 1/2	40 064 P 01 00	2.34 – 2.91	59 – 75
3	40 076 P 01 00	2.99 – 3.46	76 – 88
4	40 102 P 01 00	3.94 – 4.33	100 – 110
5	40 127 P 01 00	5.00 – 5.35	124 – 136
6	40 152 P 01 00	5.82 – 6.37	148 – 162
